## Academic Project

- **Project Title** : Airline Reservation System

Design and Develop Airline Management System to Maintenance of Flight details such as number of Flights in the systems, available timing and present spot of the Flight, Passengers details etc., using web applications.

- **Project Title** : Heart Attack prediction using Retinal Images

Utilizing retinal images for heart attack prediction, this project aims to develop a non-invasive diagnostic tool. By analysing retinal features and correlating them with cardiovascular health indicators, we seek to create a predictive model. The ultimate goal is early detection and prevention of heart attacks through accessible and cost-effective screening methods.
